

## Engaging with IEEE: New perspectives in education, science and technology

IEEE Romania Section Round Table @ AQTR 2026

Organizers:

- Prof. Liviu Miclea (UTCN) – IEEE Romania Section Membership Development
- Prof. Grigore Stamatescu (UPB) – IEEE Romania Section Chair

Engineering plays a vital role in addressing current social, environmental and economic challenges through the emergence and continued development of intelligent, robust and trustworthy systems. The round table provides a forum for open discussion among academics, researchers, engineers and students, on the current opportunities for high impact engagement within the engineering community and the society as a whole. It focuses on membership development and new initiatives that contribute to a substantial dialogue across all stakeholder categories and driving collaboration towards improving quality of life and socio-economic opportunities with the help of technology. Participation is encouraged for all conference attendees.

The [IEEE Romania Section](#) is the national geographical unit of the Institute of Electrical and Electronics (IEEE) – the world’s largest technical professional organisation. Our 1000 members, grouped into 30 technical society chapters, student branches and affinity groups, represent a diverse range of disciplines, from electrical and electronics engineering to automation and computer science, energy engineering, and beyond. Through conferences, workshops, and related technical events, we provide a platform for knowledge sharing, professional development, and networking, empowering our community to stay at the forefront of technological advancements.
